

Jena, 23 August 2026

Invitation to the 25th meeting of the Molecular Biology Working Group of the German Society for Reproductive Medicine (DGRM) in Erfurt, 12–13 October 2026

Dear Colleagues,

we would like to cordially invite you to the 25th meeting of the DGRM's Molecular Biology Working Group, which is due to be hosted by Jena this year and will take place in Erfurt on this occasion. We have decided to hold the event from Monday lunchtime to Tuesday lunchtime, so that it should be convenient to travel to and from the venue on both days.

Once again this year, we would particularly like to encourage younger researchers in the field of reproductive science to present and discuss their molecular biology-based research projects in an informal setting.

We are delighted to have secured an internationally renowned scientist as our keynote speaker again this year. Prof. Kateřina Komrsková from Charles University in Prague, the Czech Republic, will not only speak about her research but also provide insights into her personal academic career.

We are pleased to announce that an attractive prize for the best presentation will once again be awarded this year. Meals and accommodation will be provided.

To register a short presentation on current scientific projects in gynaecological endocrinology, reproductive medicine and biology, please send us an abstract (Word, Arial 10–12, max. 1 DIN A4 page, margins 2.5 cm, Structure: Title, Authors, Institution, Introduction, Materials and Methods, Results, Conclusion) to markert@med.uni-jena.de

++++++ Deadline: 1 September 2026 ++++++

The venue will be the [Evangelisches Augustinerkloster](#) in Erfurt (Augustinerstraße 10 | 99084 Erfurt).

We hope that, with your contributions, we will once again be able to organize a high-quality, informative and discussion-rich meeting this year, and we would like to thank Merck Healthcare Germany for their support.

Please also forward this invitation to interested members of your reproductive medicine/biology working group.

We look forward to receiving your registration and to seeing you again in Erfurt.

Yours sincerely

Professor Dr Udo Markert
Jena University Hospital, Department of Obstetrics, Placenta Laboratory
